

BRING YOUR HEART BACK TO YOUR PRAYER.

Many Muslims pray five times a day and still feel distracted, anxious or absent in their salah. In this therapeutic manual, Imam Ayman Al-Taher integrates Mindfulness-Based Cognitive Therapy (MBCT) with the practice of Islamic prayer.

Step by step, it shows how attention, breath, thought and emotion can be gently trained so that each prayer becomes a place of presence, calm and connection with Allah.

WHAT CLIENTS ARE SAYING

"He has taken a non-traditional approach that still remains grounded in Islamic values and our way of life... He listens with intention, creates a space that feels safe and balanced for both of us, and encourages empathy in a way that feels practical and deeply respectful."

"His approach is calm, clear, and compassionate, and always rooted in what will benefit the marriage, not just the individual."

"He combines his excellent grasp of the subject matter with a high level of empathy, kindness, trustworthiness and respect for his clientele."

For individuals, clinicians and imams seeking a faith-aligned, evidence-based path to *khushu'*, and to the healing it brings.
